Is there a difference in the average Graham Canyon ranking between ALL students and ALL faculty?

Students vs Faculty

Hypothesis Testing

Is there a difference in the average Graham Canyon ranking between ALL students and ALL faculty?

Two Sample t-test

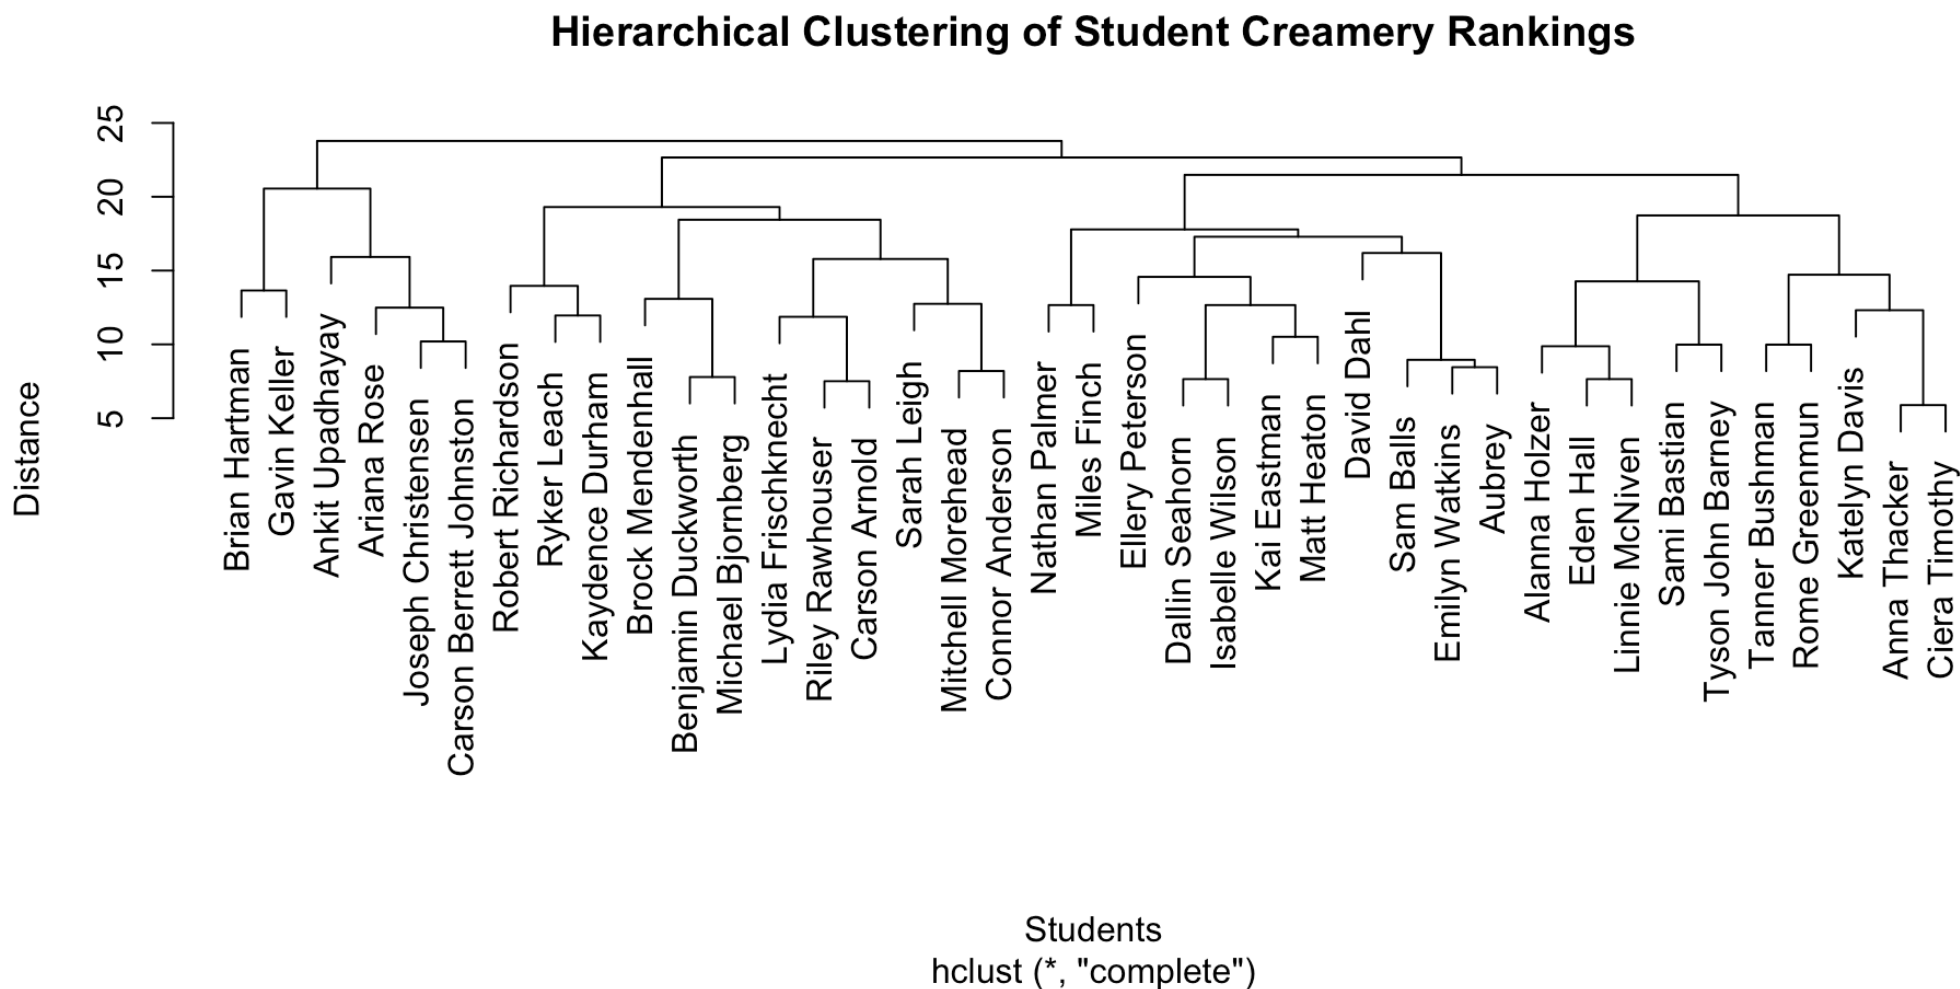

```
data: studentRank and facultyRank
t = -1.0815, df = 37, p-value = 0.2865
alternative hypothesis: true difference in means is not equal to 0
95 percent confidence interval:
 -5.17244  1.57244
sample estimates:
mean of x mean of y
  4.0      5.8
```

Based on this test (take some stats courses!), we conclude there IS NOT a difference in average Graham canyon ranking between faculty and students.

Clustering

Rather than differences, can we identify individuals who have similar ice cream tastes?
